ANNUAL BULB
OFFERS
1925

Elliott Nursery Co. Pittsburgh-Pa.

Behind the Scenes in Holland

HE American traveler who is so fortunate as to visit some of the smaller and more private bulb gardens of Holland in their full glory of bloom, cannot fail to be impressed with the unusual size and perfection of the flowers he sees. "Such blooms," he exclaims, "are never grown at home. How can I get some of these for my own garden?"

To him, all unknowingly perhaps, has been given a glimpse behind the scenes. For the traditional bulb industry of Holland is more than a matter of great acres of Tulips and Hyacinths and Daffodils, cultivated in orderly rows like potatoes or corn. It is a matter also of little gardens, family gardens, in which only one kind of Daffodil or a certain class of Tulips, perhaps, is given the loving care which brings them to their ultimate perfection of size and beauty.

Only in the gardens of these specialists, whose breeding art has often been handed down from father to son for many generations, are produced Holland's finest bulbs—bulbs such as never reach American flower lovers through the ordinary channels of trade.

How You Can Get These Special Bulbs For Your Garden

THERE is only one way to secure these bulbs of extra quality and breeding. No one bulb farm, however extensive its fields, can ever supply them all in equal perfection. They must be personally selected out of the gardens of hundreds of specialists. And that is the Elliott method.

Each year Elliott representatives personally inspect and select the bulbs, which Elliott customers order before July 1st, right in the gardens of the famous Dutch Bulb breeders. By this method of going direct to the most expert individual grower of each kind of bulb, a *method followed by Elliotts alone* among American horticulturists, you can secure the very cream of Holland's bulb crops.

These special bulbs are not plentiful, but by dealing direct with the small grower and buying only what is needed to fill your import orders, Elliotts can offer the extensive list of fine varieties described in this catalog at prices often lower than are charged for bulbs of mediocre quality.

Every Variety in this Book has been Tested

EVERY new Tulip, Hyacinth, and Daffodil, no matter how beautiful it may appear when first we see it in Holland, must be thoroughly tested and proved to be equally desirable under American conditions before it can have a place in the Elliott Bulb Book.

Each year at the various Elliott Nurseries thousands of bulbs are grown, both under glass and in open fields. There can be seen hundreds of new sorts not yet fully tested, as well as all of the proven Elliott specialties and standard varieties. Visitors are always impressed with the wonderful display. Even gardeners of long experience are often amazed at the exceptional results which Elliott bulbs produce.

These trials are convincing evidence of Elliott's outstanding leadership in the realm of bulbs.

Do You Believe in *Quarantine 37*?

Do You Realize What It Means to American Gardens?

Quarantine 37, imposed by the Federal Horticultural Board in 1919, has already resulted in the virtual exclusion from our gardens of many beautiful and desirable flowers, and in needlessly high prices for others.

An extension of this Quarantine, effective after this season, will exclude Narcissus including **all Daffodils**, as well as Snowdrops, Chionodoxas, Scillas, Fritillarias, Grape Hyacinths, Ixias and Winter Aconite.

Further extensions are contemplated!

Many eminent horticulturists do not agree with the policies and provisions of Quarantine 37.

It is the time the interests of America's garden lovers were consulted. You are concerned, as a lover of flowers, more than you perhaps now realize. You owe it to yourself to thoroughly investigate Quarantine 37 and then, if you see fit exercise your influence for its correction.

The Atlantic Monthly in its March, 1925 issue, published an article by Dr. Stephen F. Hamblin, Director of the Harvard Botanic Gardens, which is the most careful and most conservatively written study of Quarantine 37 we have seen. Every gardner should read it.

We have secured a number of reprints of Dr. Hamblin's article and will gladly send a copy free to every gardner who asks for it.

Please ask for it. Indicate your desire for a copy of Dr. Hamblin's article by a note on your order, or by dropping us a card, and it will be mailed at once.

THE ELLIOTT NURSERY COMPANY

Florida in the Wintry North

FLORIDA, with its beaches, its palms, its foliage and its leisurely beauty, has the normal temperature of our living rooms, through the Winter season in the North. During these long indoor months for Northerners when bleak winds, biting frosts and heavy snows rob us of the beauty of leaf and bud and flower outside, the heart grows lonely for the companionship and cheer that the color and fragrance of plants and blossoms bring. Beyond the decorative gifts which flowers add to the room, they bring into sensitive lives a unique friendship which is only known to those who love their plants and tenderly nurture them. Flowers somehow become foster children of the Winter household.

Those who order their floral decorations either as great bunches of beauty or as developed potted plants can never know the rich joy, the refining influence or the happy diversion that comes to those who plant and develop their own flowers in the home. In many houses a blooming plant is the one great decoration of the breakfast and dinner table, while a guest room is transformed into an alluring cozy corner by the presence of a growing plant, giving tone and color and life, like the gladness of Summer, in its welcome to a weary visitor.

And what language can describe the actual charm of the little kitchen window, with its soft white curtains and its delicate flower of golden, purple, crimson and white. There is something of another world brought to us in flowers blooming at Mid-winter in the home. No family can afford to live without these uplifting touches of Nature.

Flowers in the House All Winter

It is easy to have an abundant supply of flowers in the house from Christmas, or earlier, until Easter, and with no greater facilities than are to be had in every dwelling and at comparatively small cost. The best bulbs of Paper White Narcissi cost \$6.00 per hundred, and often produce two flowers to the bulb. Florists sold these flowers last Winter at \$2.50 and \$3.00 per dozen. By growing your own flowers, you save three profits; the grower's, the wholesale dealer's and the florist's, and then you have the fun of growing them, which is simple and easy and the results certain. Another advantage is that your own flowers will last ten days, while bought flowers hardly last two or three.

For many years we have supplied a lady of this city with several thousand forcing bulbs annually. From the size and character of her order, we supposed that she had a greenhouse and a gardener, but having occasion to visit her house last Winter, we found that she grew and bloomed all the bulbs in the cellar and living-rooms of the house. We never before had seen such a fine display. Every living-room was filled with perfect blossoms, most artistically arranged. This display was kept up all Winter and Spring, until flowers were blooming in the garden. Many of us cannot grow bulbs by the thousand, but we can all have some. Paper White Narcissi and Roman Hyacinths can be had in bloom in December and, in succession, until the glorious Spring flowers are in bloom outdoors.

The bulbs may be potted up as soon as they are received in the Fall and may be put directly into the pots, jardinières, or

other ornamental receptacles in which they are to bloom, but we find it most satisfactory to grow them in shallow wooden boxes, four or five inches deep, and, when the bulbs are coming into bloom, rearrange them in the pots, baskets, or jardinières they are to be displayed in.

When the flowers are ready to open, take the bulbs out of the boxes, shake the soil from their roots, and rearrange with moss about the roots and bulbs in the receptacles to be used. Keep well watered and the flowers will develop just as well as if the bulbs had been allowed to remain in the soil.

The soil in which bulbs are potted should be light and rich; one-half good garden soil, one-fourth sand, and one-fourth rotted stable manure is about right, and these should be thoroughly mixed and pulverized before using.

In planting the bulbs, set them close together, from two to four inches apart, and just deep enough to have the tops of the bulbs covered. After planting, water thoroughly, place in the coolest and darkest part of the cellar, away from the heat. Freezing will not hurt them. If the cellar is a light one, darken a corner of it for the bulbs. While in the cellar the soil should be kept moist but not wet. After the bulbs are well rooted, they may be brought into the light and heat for flowering and then kept well watered. Paper White Narcissi and Roman Hyacinths may be brought into the light and heat in December, but all other varieties of Hyacinths, Tulips and Narcissi not until after February 1st. Paper White Narcissi can be grown in gravel and water. Do not attempt to force cheap mixed bulbs of any sort—the result will be a failure.

Best Varieties For Forcing

Throughout this catalogue the varieties of bulbs suitable for house-culture (forcing) are described. To save looking through the entire catalogue, we have listed below those varieties which we ourselves have found to be the best.

Late Tulips For Forcing

Unless you have a very considerable amount of cultural skill, and, in addition, have at your command every facility, do not attempt to force late Tulips. It can, of course, be done, but if the amateur attempts to do it, he will almost certainly fail. However, Darwin and Breeder Tulips are of unsurpassed loveliness when forced, and if you are very sure of your skill and knowledge, and wish to have something that no one in your community will be able to rival, you are justified in attempting it. Follow the directions given in the pamphlet which accompanies each of our shipments of bulbs very carefully and use only the following varieties

Collections for the House

For the inexperienced we have made up collections of bulbs suitable for house culture. These collections contain the very best varieties for forcing and can be bought with every confidence. These collections are standard collections, and each collection is exactly like every other collection. If a different selection is wanted, this selection must be made out by the customer. If a higher priced collection is needed (above \$20.00), we will be glad to extend our service, and in the making of the collection follow the suggestions made by the customer or, if entirely left to us, use our best judgment. All that is necessary for us to know is the price limit.

Narcissus—Paper White

SOME flowers are like certain esthetic people whom we meet, in whose faces are seen the rarest delicacy of features jointed to the most austere and simple surroundings. The Paper White Narcissus belong to this unromantic but most winsome class. Their demands are most meagre:—an old abandoned kitchen bowl, a few odd pebbles from the brook among which the bulbs nestle as if it were genial soil; water to cover them fully, with light and warmth to hasten them forward and the kitchen or living room is soon made into a place of cheer for November or April. Nearly all plants require some special earnest care, but these immaculate delicate flowers ask only the barest opportunity and they thrive as if it were a joy to live. Any lover of pure white blossoms can succeed with these plants, though they have neither garden and soil and but one little window where light can creep in. Every house should have them.

You may grow these bulbs in soil or in fibre, in pebbles and water in a bowl, or in water alone in a Hyacinth glass, whichever method is the most convenient for you. It is as nearly impossible as anything can be in this life to fail with Paper White Narcissus.

Narcissi, the Democrats of Flowers

THE Narcissus or Daffodil is too easily grown to call forth the glowing enthusiasm to which it is justly entitled. Timid, dainty things they are, that await the resurrection of their neighboring crocus friends before they venture forth out of their Winter dream and sleep. They ask for no attendants, require no special culture and yet present a scene of beauty that delights equally the esthetic vision and the gaze of the untutored eye, each already weary with the dull drab of a tedious Winter.

They have all the grace and charm of the true aristocrat with the reckless freedom of the unhampered democrat; asking no privileges and yet asserting their inherent right to herald the arrival of Easter and of Spring. It is indeed surprising that any American garden should be without these delicate and yet hardy plants and flowers.

We presume that for every Narcissus bulb planted there are one hundred Tulips or Hyacinths. That this is a great mistake, anyone really familiar with their great merits must admit. Daffodils lack the brilliancy of color of the Tulips, but greatly surpass them in variety, delicacy and gracefulness of form, and one never becomes tired of their soft, beautiful colors.

The great point in their favor is that they are permanent additions to the garden. All that they ask is that they be allowed to remain undisturbed, and they will increase in size and beauty year after year, blooming profusely and in great numbers each year. Many varieties are perfectly at home naturalized in the grass, provided the grass is not cut before their tops have time to ripen.

TRUMPET NARCISSI

Doz. 100 1,000

Emperor. This is the largest and finest deep yellow trumpet-flowered Daffodil in cultivation, and is really superb, both in foliage and flower. Either for the garden or for naturalizing, it is one of the very finest varieties and cannot be commended too highly. **Monster bulbs**, more than twice the size of those usually sold \$1.25 \$8.75 \$83.00
First quality selected90 6.50 62.00

EMPRESS. (Bicolor). This may be considered rather a high-priced Daffodil for planting in the grass, but the effect produced is so lovely, and it is so hardy and vigorous, that nothing can be planted that will be more satisfactory, and, as we control the best stock of it in Holland, we can make a specially low price. If planted in orchards, meadows or any place where the grass is not mown by a lawn-mower, these Daffodils will increase in quality and beauty year after year. Where they are planted, the grass must not be mown before the middle of June, so that the bulbs may have time to ripen before the tops are cut off. Our Emperor and Empress Narcissi are more than double the size of the bulbs usually sold. **Monster size** 1.25 8.75 82.00
First quality selected90 6.50 62.00

Fairy. Perianth primrose, trumpet chrome-yellow. A beautifully formed large trumpet. One of the most desirable for the garden as it is a strong grower and one of the few which will come up each year without deteriorating 1.50 10.00

Glory of Leiden (True). Perianth and trumpet of deep yellow. The largest and finest of the newer Daffodils. A superb and distinct variety that should be included in every amateur's collection of choice Daffodils 1.20 8.50

Glory of Noordwijk. This is one of the finest and largest of the Bicolor trumpet Narcissi. Perianth sulphur white, trumpet clear yellow, very large and graceful and with reflexing brim 1.50 10.00

GOLDEN SPUR. This is one of the most valuable of the Trumpet Narcissi, with magnificent, deep yellow trumpet, the brim expanding like Maximus, and large, spreading, full, deep yellow petals. It is freely-flowering and splendid both for house culture and outdoors, and is one of the most desirable varieties for naturalizing. A charming, richly perfumed flower. **Monster size** 1.20 8.50 80.00

The Orderly Hyacinths

HYACINTHS placed in orderly Dutch beds remind one of soldiers standing at attention, for though they do not speak they silently salute and their salutation awakens a sacred reverence within one's heart as he pauses to feast his eyes upon these gayly colored flowers. They seem happiest when placed in comradely fellowship with others of their own clan, though possibly of differing complexion. Unlike the Crocus and Narcissus the Hyacinth is helpless without the assistance of his gardener.

If one loves his plants, however, this is his great opportunity, as the Hyacinth welcomes attention and responds to every atom of care. For his labor the house gardener will find a rich reward. The delicate beauty of the flower is only surpassed by its rich fragrance; and the little bell-shaped petals suggest the music and harmony this flower would bring into our discordant lives.

Named Hyacinths of the quality imported by us can only be had from a few dealers in this country and are generally sold at much higher prices. They are selected exhibition bulbs, and have won first prizes wherever exhibited, both in this country and in Europe. Hundreds of our customers write that they have never seen such fine flowers as these bulbs produce. We are confident that anyone who will try these Hyacinths or any of the named bulbs offered in this catalogue, will never again be satisfied with inferior bulbs.

Second Size Named Hyacinths

The second size Hyacinths will be found fine for forcing and are highly recommended for those who desire extra good bulbs for bedding. They embrace the leading named sorts of the preceding list, are larger bulbs than those sold as mixed, and strictly true to name and color, thus giving exact shades wanted. We can offer them in the following varieties, all of which are described in the general list.

Single Small Hyacinths for Forcing

These Single Small Hyacinths, planted on arrival from Holland, may be had in flower early in January. The bulbs and flowers are about the same size as Roman Hyacinths, but much stronger, and the bells are larger. WHILE THEY DO NOT COST HALF THE PRICE OF THE ROMANS. Only those varieties which produce the fine flowers and force easily are selected for this class. They may be planted like Tulips in pots or boxes close together. Last season we sold large quantities, and our customers inform us that they are a GREAT ACQUISITION to succeed the Roman Hyacinths, blooming from January to April.

Prepared Dutch Hyacinths—Miniature

ROMAN HYACINTHS, due probably to the neglect of the French bulb fields incidental to the war, have deteriorated in quality until they no longer give satisfaction. Consequently, until the quality is again satisfactory, we have concluded not to offer them. Instead we are offering Prepared Dutch Hyacinths for early forcing. These should be grown in the same manner you have been accustomed to in growing Roman Hyacinths.

FOR THOSE WHO WANT THE BEST

A Selection of the Finer Things in Narcissi

NARCISSI are now so generally known and so extensively planted that it is hardly necessary to call special attention to their merits. However, specialists who devote their lives to this work constantly produce new varieties. The Narcissi shown on the color plate opposite together with the list following are in our judgment the very best of the newer things, and represent a real improvement over the standard varieties.

For standard varieties of Narcissi see page 7.

Admiration	Poetaz. Perianth and eye sulphur yellow with scarlet edge. A beautiful new variety and free bloomer. From three to five flowers on each stem. Each, \$0.25	Doz.	100
		\$2.75	\$18.00
Cornelia	A very large, beautifully formed soft yellow trumpet. One of the very finest of the yellow Trumpet Narcissi and an excellent grower	2.75	18.00
Duchess of Westminster	Perianth pure white; cup soft yellow. Very large star-like flowers and one of the most beautiful of this type. Excellent for all purposes	1.25	9.00
Evangeline	A fine Leedsii Daffodil of great beauty and wonderful form	1.20	8.50
Great Warley	(Incomparabilis) broad, massive, creamy white perianth; cup golden yellow. The largest Incomparabilis variety. Each, \$1.00	11.50	
Homespun	The most beautiful clear yellow Incomparabilis Daffodil	1.65	11.00
King Alfred	A yellow trumpet of the noblest character. Deep golden yellow	3.00	22.00
Lady Audrey	White Trumpet. Creamy white-perianth and very soft pale primrose trumpet, passing into white as the flowers age. A large flower of exquisite beauty	2.50	18.00
Lady Margaret Boscawen	(Incomparabilis) The Bi-color Sir Watkin. Broad perianth of snowy white; trumpet-shaped crown of deep, rich yellow. A magnificent variety. Each, \$0.60	6.00	
Leedsii, Lord Kitchener	Large, snow white perianth; big crown of palest primrose elegantly fluted at the brim. A perfect flower. Each, \$0.30	Doz.	100
		\$3.00	\$22.00
Lord Roberts	Yellow Trumpet. Huge star-like perianth of great substance with bold trumpet. The largest Incomparabilis variety. Remarkable beauty and enormous size. Each, \$0.80	9.50	
Olympia	This remarkably fine Daffodil might briefly be described as a greatly improved Emperor, being much larger in size and of a richer, deeper color. It is a wonderfully strong grower, with fine, broad blue-green foliage, and its bold, majestic, yet artistic flowers are produced very freely. This is surely one of the coming Daffodils both for growing in pots indoors and for outdoor culture. Each, \$0.35	3.25	26.00
Queen of the North	Leedsii, large, glistening snow-white perianth of a silky texture. Cup palest soft primrose shading into white at the daintily ruffled edge. One of the most lively of all the Narcissi	1.75	12.00
Red Beacon	The finest and most intensely brilliant of the Barrii type	3.25	26.00
Spring Glory	A Bi-color Trumpet Daffodil of superior quality	2.50	18.00
Sulphur Beauty	The nearest approach to pure white. The best white narcissi in cultivation	1.50	10.00
Tresserve	Sulphur yellow, very attractive; enormous large flower. Excellent for forcing. Each, \$0.40	4.00	30.00
Weardale Perfection	(Bi-color Trumpet). Solid white perianth, soft primrose trumpet of immense size. Each, \$0.25	2.75	21.00
White Lady	A Leedsii Daffodil of exquisite beauty and gracefulness	1.10	7.50
Will Scarlet	(Incomparabilis) Creamy-white perianth. Wide brilliant orange-scarlet crown. Each, \$0.30	3.00	25.00

Narcissus King Alfred

Crocus Pallas

White Crocuses and Fluffy Chicks

THE first peeping Crocuses and the first peeping, fluffy chicks seem some way close of kin, even though biologists do not rank them of the same house and lineage. They both come when winter is still contending for the right to reign, when Spring is only timidly and feebly throwing out her light and warmth. Every other thing of beauty seems afraid of frost and sleet and snow, but the brave, smiling crocus is undaunted by the cold.

In all the Summer months which follow, no other plant of gorgeous size or radiant color appears which calls for such shouts of actual joy as do these harbingers of warm and sunny days. Crocuses are intruders without being supplanters, as they modestly lift their delicate petals alongside the grass without uprooting it—both waking together from their long Winter sleep. These dainty little flowers assure us that Spring is at the door, therefore, everybody watches them, knows them and loves them.

Even the possessor of only the smallest strip of grass should have it filled with Crocuses. The cost is but a trifle, and once they are planted they are no further trouble. They bloom beautifully year after year, and do not interfere with the mowing or care of the lawn. Grass, however, should not be mown for two weeks after the flowering of Crocuses, but it does not ordinarily need cutting earlier than this. They should be planted in the Fall and set from one to two inches below the surface of the ground. They can be planted with a narrow trowel or a stiff-bladed knife.

The Aristocratic Breeder Tulip

BREEDER Tulips seem to speak of noble birth and long aristocratic lineage, since there is a restrained elegance in the almost sombre-toned bronze colors that remind one not only of an ancient cultivated family but also of old mahogany finished in quiet dark shades; or perhaps of soft appealing music from an instrument of reed or string. The Breeder speaks of the higher ranges of life.

Not only the color but also the fragrance is delicate, like costly scented waters that are treasures of a well equipped boudoir. All together these stately high-breds are thoroughly enjoyable because the eye tires of brilliant shades alone and wants them softened by the contrast provided by these quiet restful beauties.

We are ever needing the strongest influences to call us away from the sordid pursuits and estimates of life and there is a powerful appeal in a flower that suggests dignity with restraint, as well as elegance with simplicity. The Breeder Tulip makes a distinct and worthy contribution to any garden of flowers.

The Gay and friendly early TULIPS

AMONG true lovers of flowers, the simple, well-known friendly plants are never entirely forgotten. They have an effect upon the eye that is only equalled by the music of childhood in its sensitive influence upon cultivated minds in mature life, when suddenly the sweet, familiar strains reach the ear. Some flowers are so catalogued as to frighten the amateur and make him afraid to attempt the cultivation of the plant. These varieties are so familiar, so friendly, so actually gay in their simple charms that every eye admires them; and yet so easy to cultivate that every one can grow them. Other plants may seem to live to be admired, while these flowers suggest that they live alone to be enjoyed. Every garden should have at least one glad corner where these tulips are the chief thing of beauty.

Early Double Tulips

THE saddest feature in the lives of Tulips is the brevity of their days. Some of us feel that we can hardly be reconciled to their early fading. They have glorified life while they were here and then suddenly their beauty vanishes. The double Tulip comes to lessen our regret. It begins to bloom later and continues longer, and is therefore a necessity to full Tulip season. Each year the interest deepens in the cultivation of these beauteous creatures of the soil, that display such radiant and indescribable tints and that rest and refresh and gladden us in the tedium of life.

There are flowers that are transient in their hold upon our affections, like fads in fashion of manner and dress, but Tulips increase in the attachment and devotion which they credit through the years and have become a stable as well as a staple article in the market. The double Tulip therefore serves a double purpose.

The double Tulips are very desirable for bedding purposes. White, red and yellow sorts, of about the same height, planted in lines of three or four rows of each color, form, with their large, rose-like flowers, beds of surpassing grandeur. Their flowers, being double, are quite persistent, and being also late in blooming, they serve to prolong the season of gorgeous beauty in the Spring flower-garden.

The Double Early Tulips have massive flowers of brilliant and varied colors, shades and markings, and last much longer in bloom than the single varieties. They are robust growers and exceedingly effective.

Parrot Tulips

Parrot Tulips sometimes do not bloom satisfactorily, owing to improper planting. They like a light, sandy soil, shallow planting, and a sunny location.

Parrot Tulips do not receive the attention they deserve. These belong to the late or May-flowering Tulips, and have immense, attractive flowers of singular and picturesque forms and brilliant and varied colors. The petals are curiously fringed or cut, and the form of the flower, especially before it opens, resembles the neck of a parrot. They form extravagantly showy flower-beds, and should be grown in every flower garden in quantities. They are especially desirable for cut-flowers. The Parrot Tulips we import are from the most famous grower of these in Holland, and very superior to these usually sent out, which are often immature bulbs and will not bloom well under the most favorable circumstances.

MAY FLOWERING OR COTTAGE TULIPS.

Old English Garden Tulips

WE occasionally meet a man or woman who at once suggests to us the quaint phrase, "A Gentleman and Lady of the Old School." Flowers sometimes speak to us in the same instructive way. They suggest types of persons who have always their own peculiar and compelling fascination, so that even a glimpse of them in passing suggests a gladsome reverence like the view of the lovely flowers. The Cottage Tulips have a message and language all their own. They are tall, dignified, stately, bending gently only under the breath of a strong wind and seem to suggest to us the simple gracious bearing which we ought to maintain in the company of our friends. Other varieties appear, but these fine Tulips hold their places in the strong affection of many, for beauty reveals itself in simplicity among plants as well as among people. A garden of Tulips is incomplete without samples of these familiar old friends so loved by our grandparents in other years. One of the wholesome signs of our day is this renewed admiration for the modest, friendly, old-fashioned flowers so highly prized to the quaint gardens of sixty years ago.

The Princely Darwin Tulips

WHEN visiting a quiet garden of Tulips or reveling in the larger display of a great Tulip Show, the inquiry naturally arises: "To what degree of imposing beauty has the Tulip come through these long years of careful culture?" The Darwin is the answer to that inquiry. It has been an evolution, a long evolution. The results of many generations of skillful culture have culminated in the Darwin.

Other varieties may consort with this first-rank Tulip, but none need pose as rulers of the realm. The Darwin is the Crown Prince and heir to the throne. In the stately development of the stem and the equally striking flower that crowns it, every rare tint has been retained and a very riot of colors display themselves in rose, heliotrope, claret, crimson-marooned with other wonderful shades that are known and prized by lovers of flowers.

Darwin Tulips are most valuable for permanent planting. With deep planting, four to five inches in heavy soil, and six inches in light soil, they will continue to bloom for years, and for this reason they are very valuable for planting in shrubberies and borders. They also thrive in semi-tropical climates, such as those of California and the Southern states, better than the early Tulips.

Lilies

The greatest of all Naturalists said "Consider the Lilies." The centuries do not change that dictum. Lilies forever stand apart from the rest in the kingdom of flowers, as something akin to virtue. Lilies are symbols of delicate, unsullied beauty.

Some brilliant blossoms are voluptuous in their lines as if paint and rouge were added to their enameled skins, but the lilies whisper of refined restraint and the happiness that goodness brings into human life. The universal love and reverence felt toward lilies makes all eulogies seem commonplace and thus superfluous, since men and women of every degree of culture turn aside to enjoy the winsome picture that lilies offer.

Lilium Candidum

Many people think that it is necessary to plant this lovely Easter or Annunciation early in September. This is not true. We have repeatedly planted them in November, and with complete success. In the Fall of 1918 we planted over 10,000 bulbs late in November. These bloomed splendidly the following June, and we sold flowers in the wholesale cut-flower market for more than double the price of the bulbs. Owing to the demoralization of the transportation systems of the world, it is no longer possible to deliver Candidum Lilies by September 1st, and people who insist on such early delivery are only depriving themselves of one of the loveliest of all

garden Lilies. We have made arrangements for the earliest possible delivery, and, if these Lilies come in late, will not ship them to Northern points where it is actually too late to plant them.

Extra large selected bulbs	.45	4.50	32.00

Our bulbs of this splendid white Lily are the finest that come to America and are much larger than those usually sent out. We can supply bulbs from both southern and northern France.

Japanese Lilies

Transportation between Japan and United States is not yet back to its pre-war schedule and consequently, Japanese Lilies may not arrive in time for Fall planting. In this event the bulbs will be carefully packed in sand and placed in safe storage until the proper planting time in the Spring, when they will be distributed.

Auratum. Gold-banded Lily of Japan. Large and graceful flowers of delicate ivory-white, closely dotted with chocolate-crimson spots; the center striped golden yellow. 3-4 feet. July and August.

Special Offer of Superbum Lilies

We make an annual contract to have 25,000 bulbs of the grand Lily grown for us. This enables us to offer it at low prices which make it available for naturalizing in quantity. It is unquestionably one of the most satisfactory Lilies that can be planted either in the garden or in meadows, on the edge of woods or in any rough or wild parts of the grounds, where it will take care of itself without any attention whatever after planting. It will also thrive in wet or swampy places. It is a grand Lily often growing over eight feet high, and produces twenty to thirty orange-red flowers in July when flowers are apt to be rather scarce.

Prices of extra-selected bulbs, \$2.25 per dozen; \$4.00 for 25; \$15.00 per 100; \$35.00 for 250.

Calla Lilies

White Calla (*Richardia Aethiopica*). The White Calla, or Lily of the Nile, is a well known plant of easy culture, and in Winter is one of our best window plants. To aid profuse blooming keep them dormant from the middle of June until the last of August; repot in good, rich soil, using 6 to 8 inch pot; give water, light and heat in abundance, and the result will be most satisfactory.

TERMS OF PAYMENT, Etc.

Please read before ordering

HYACINTHS, Tulips, Crocuses, etc. The prices quoted in this list on all Dutch Bulbs, Bermuda Lilies and other bulbs are for advance orders, which must reach us not later than July 1, 1925. To make these very low prices, we must have our orders in advance, as we cannot take any risk of having stock unsold on our hands. The bulbs will be delivered upon arrival, and need not be paid for until after delivery. Prices quoted include duty and all charges, except freight, expressage, or postage, from Pittsburgh. On small lots of bulbs sent by mail, postage will be charged at cost, including insurance.

TIME OF DELIVERY:

Bermuda Lilies arrive in August; Roman Hyacinths Freesias, Candidum Lilies and Paper-White Narcissi in September; Dutch Bulbs, Hyacinths, Tulips, etc., in October. In ordering please state whether you wish your bulbs shipped as they arrive or all in one shipment. In absence of instructions, we will send all bulbs in one shipment, except

Japanese Lilies and Lily-of-the-Valley, which will be shipped upon arrival, in November, December, or following Spring. Transportation conditions are still so unsettled that we cannot guarantee time of delivery, but in the event of late delivery, northern orders will be shipped first, and extreme southern ones last.

SHIPPING

INSTRUCTIONS: Please send full shipping instructions. State whether goods are to be shipped by express or parcel post, and by what route. In the absence of instructions, we will ship by whatever method and route we think best.

Please print your name and address on your order. Many times it is exceedingly difficult to read these two important points of an order, and a shipment may go astray.

TERMS OF PAYMENT:

Our terms of payment are invariably cash on delivery, which does not mean that we ship C.O.D., as we will not do so under any circumstances. We deliver the goods and mail bills at the same time, and expect payment within a few days.

People unknown to us will please send references with their orders. Those who wish to send cash in advance with their orders will be allowed a *discount of five per cent.* from the prices quoted on this list on all orders made up from this catalogue, received before July 1, 1925.

GUARANTEE: We guarantee all trees, shrubs, plants, and bulbs furnished by us to be first class, and true to name.

We do not guarantee stock to grow, or results in any way. No complaint will be entertained that is not made immediately upon receipt of stock.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture; all contribute to failure, and all are beyond our control.

EARLY

ORDERS: The earlier orders are given, the better we can have them filled. Some of our customers are now giving us orders to be delivered next Spring. Our representative usually sails for Europe early in June and personally selects the stock for all import orders received by July 1st.

PRICES: Six plants of a kind will be furnished at the dozen rate; fifty or more at the hundred rate, and five hundred or more at the thousand rate. Less than six plants of one kind or variety will be sold only at the single rate.

CANCELLATIONS: No request for cancellation can be granted after July 10th, when the final orders are sent to Holland.

Import orders taken subject to the failure of the crop.

CULTURAL

DIRECTIONS: With each shipment of bulbs we send printed cultural directions, giving full instructions for growing in the house as well as outdoors.

PARCEL POST:

Bulbs and plants can now be sent by parcel post, and when it is advantageous we always do so.

Narcissi King Alfred

Important Notice

The Federal Horticultural Board has decreed that after this season no more Daffodils or Narcissus bulbs of any type may be imported into the United States. Whatever your opinion may be concerning the wisdom of this decree, it is nevertheless the law and may not be evaded.

Attempts to grow in the United States a full variety of Narcissus bulbs of good quality and at a reasonable cost have so far been unsuccessful. After this year only a very few of the commoner types will be available and those only in inferior quality, in very limited quantity, and at very high prices.

Lovers of Daffodils are seizing this last opportunity to add to their collections the finer sorts while still available, and by putting them out in permanent natural plantings, to enjoy their beauty for years to come.

If you want to have Daffodils in your garden, order them now.

R. F. Elliott

A Timely Daffodil Suggestion

Now, before importation is shut off, arrange to make a permanent planting of the newest and loveliest types of Daffodils. Those who get them now will have a garden of which to boast, for to others they will not, in all likelihood, be available again for many years.

The varieties in this collection have been chosen for their rare beauty as well as their suitability for naturalizing in locations where they need absolutely no care after planting. They represent the newest and finest Daffodils available for this purpose. Hardy bulbs of the right size—once planted they need never be renewed but will increase in numbers and beauty year after year.

It is an inspiring idea—the easiest way of growing the grandest flowers yet developed, by the hundreds and thousands.

For Those Who Want The Best

King Alfred. A yellow trumpet of the noblest character. Deep golden yellow.

Spring Glory. A Bicolor Trumpet Daffodil of superior quality.

The International Flower Show at Haarlem

This is the year of the International Flower Show, the great exhibit held in Haarlem every ten years, where growers from all over the world bring their newest and finest originations for their first showing to the public. Many American flower lovers are planning to be in Haarlem May 15th to 21st when the exhibit will be at its height.

Mr. R. F. Elliott, President of the Elliott Nursery Company, by special invitation of the Directors, will serve as a Judge of the Bulb Exhibits. To American travelers Mr. Elliott extends a cordial invitation to make full use of his wide acquaintance with Holland and the Dutch flower fields, to ensure their making the most of this unusual opportunity to see the "home of flowers" under the most favorable auspices and by the most convenient routes.

A letter or wire to the Elliott Nursery Company at Pittsburgh will bring full directions how to get promptly in touch with Mr. Elliott and avail of his services.
